

# California OES Weather Threat Briefing

Saturday, November 27, 2021  
9:00 AM PST

**Day 1 (Saturday):** Very dry and locally breezy conditions will continue to bring elevated to locally critical fire weather concerns to southern California. Areas of dense fog are expected to develop across the Sacramento Valley, northern San Joaquin Valley, and deeper valleys across far northwest California overnight.

National Weather Service

Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**11/27/21 - 12/03/21**

## **Saturday-Friday**

- Locally gusty winds, combined with very low humidity levels of 2-10% in some locations, will allow elevated fire weather conditions to continue across Southern California through the weekend. Humidity levels will very slowly rise through the middle of next week, though locally elevated fire weather conditions may continue at times for areas away from the coast due to very dry vegetation.
  - Over San Luis Obispo and Santa Barbara Counties, east winds gusting of 20 to 30 mph will form each night and morning over some mountain and interior valley areas
- Areas of dense fog are possible overnight and during the mornings across the Central Valley and deeper valleys of northwestern California through early in the week. Some areas of dense fog could also develop across coastal southern California at times Monday night through late next week.
- Otherwise, generally dry and quiet weather is expected across the state over the next 7 days

# CALIFORNIA WEATHER IMPACTS

11/27/21 - 12/03/21

<u>Hazards / Day</u>	SAT	SUN	MON	TUE	WED	THU	FRI
<b>Non-Thunderstorm Damaging Winds</b>							
<b>Snow</b>							
<b>Coastal Flooding</b>
